

Project App Android

Name : Next Level Drift

Service for car and street racing spare parts

Year : 2023

KOTLIN & Firebase

#project App Android Studio

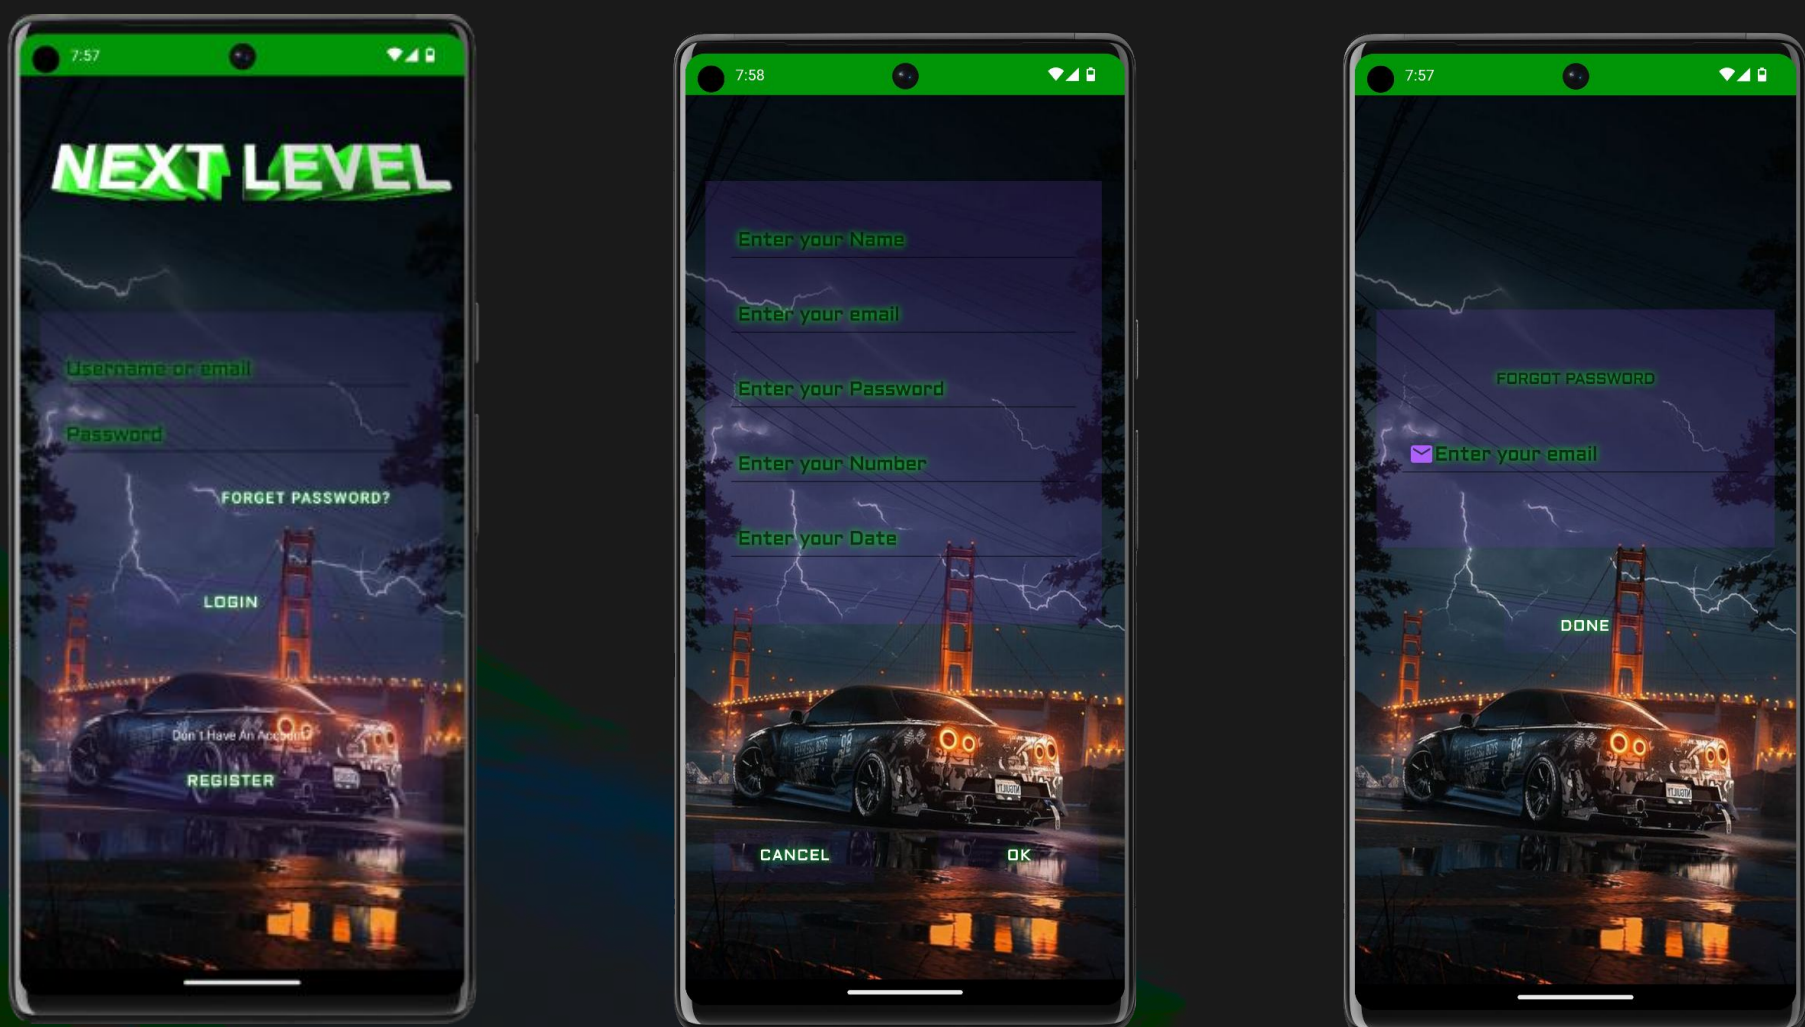

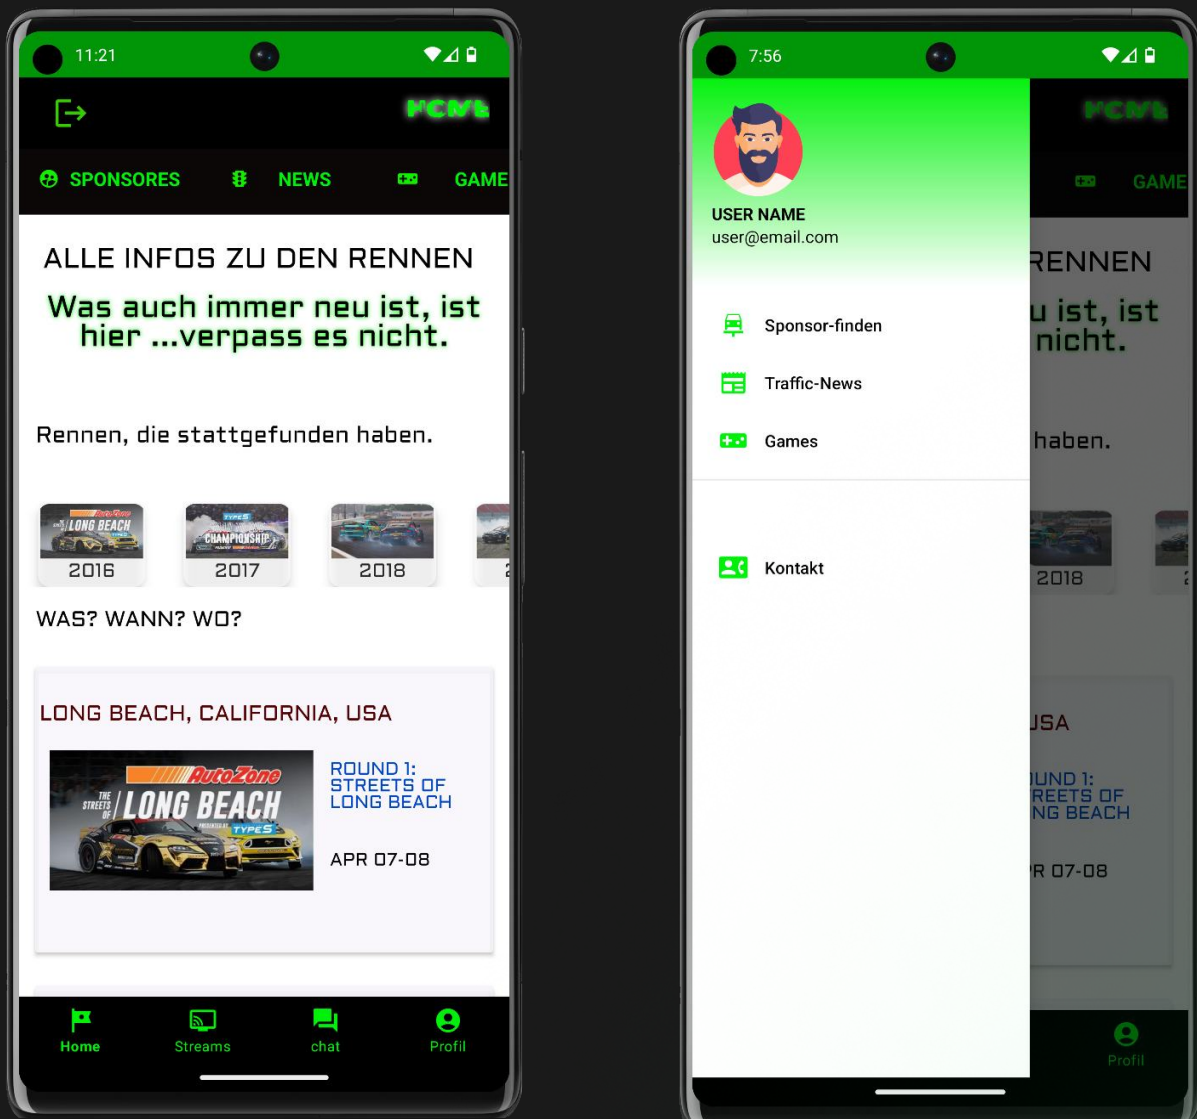

Finished Android App in Android Studio with
kotlin and java mit Final Presentation

App – Idea

We all know that car racing is a passionate activity.

Who is the application useful for?

- The application is used by garages in the automotive sector as well as by companies.
- Advertising companies that print and apply PVC film stickers to vehicles.
- People who are involved as drivers.
- People who want to talk about cars and follow a race
- Companies who want to become sponsors.

Motivation

Diese zukünftige Anwendung, an der ich arbeite, zielt darauf ab, diese Lücken zu schließen und ein integriertes System zu schaffen, von dem sowohl Nutzer als auch Unternehmen profitieren.

What the app offers :

- Simply upload a photo of your car and request quotes from designers or sponsors who work with our app.
- Watch motorsport races live and for free.
- Buy tickets via the app and scan the barcode for event access.
- Download a game from the Play Store for extra entertainment.
- Create your personal driver profile with important information.
